Who are we?

Connecting technology and people

WHO ARE WE?

An interdisciplinary and broadly composed professional research community with several PhD-candidates and 20-25 experts within the fields of:

- Computer Technology and Mobile Technology
- Audiovisual systems, Graphic Design and Multimedia Productions
- Psychology, Pedagogics, Mathematics, Physics, Chemistry, Social Sciences and Languages
- We have carried out more than 25 international projects during the last 10 years
- We have a widely spread international network of contacts, and are currently cooperating with 50 private and public organizations in 20 countries all over Europe.
- We have access to several new teaching laboratories where many students have the opportunity to participate in prototype testing

WHAT DO WE DO?

- We develop and try out new methods for teaching, learning and communication
- We develop and manufacture new technical solutions based on modern ICT and Mobile Technology, then try these out in real education situations
- We develop new ICT and audiovisual solutions in the Balkan countries and in several other countries in Eastern and Southern Europe
- We construct and build new kinds of teaching laboratories
- We deliver lectures and demonstrations of our new methods and ICT/ Mobile Technology solutions in countries all over Europe
- We commercialize the best products from our projects

WHAT CAN WE DO FOR YOU?

- Develop and establish national or international projects within the fields of how to use new pedagogical methods and new ICT/ Mobile Technology
- Develop projects on how to construct new technical solutions that will employ ICT and/ or Mobile Technology
- Locate partners in other countries
- Help prepare project applications and also manage projects
- Write project reports
